CF/CN1250 COATING THICKNESS GAUGE

Certificate AAA

- F type probe: measure the thickness of non-magnetic coatings (zinc, copper, enamel, plastic and so on) on magnetic subtracts (iron, steel)
  N type probe: measure the thickness of non-conductive coatings (varnish ,enamel, plastic and so on) on conductive subtracts (zinc, copper, aluminum)
- V-type probe to measure the cylinder easier
- Single and continuous working mode
- Low and high limits setting with judgement
- With average calculation function

CF1250

SPECIFICATION

Code	CF1250	CN1250
Probe type	F	N
Range	0~1250μm	
Accuracy	2μm(0~100μm)	
	2%(100~1250μm)	
Resolution	0.1μm (0~999μm)	
	1μm (1000~1250μm)	
Memory	500	
Power supply	3xAAA batteries	
Dimension(L×W×H)	150×50×29mm	
Weight	170g	

INCLUDED ACCESSORIES

Main unit	1pc
Calibration foil	1set
Calibration base	1pc
AAA battery	3pcs
