OSI-30 INFRARED TRANSMISSION PROBE RECEIVER FOR CNC MACHINE TOOLS

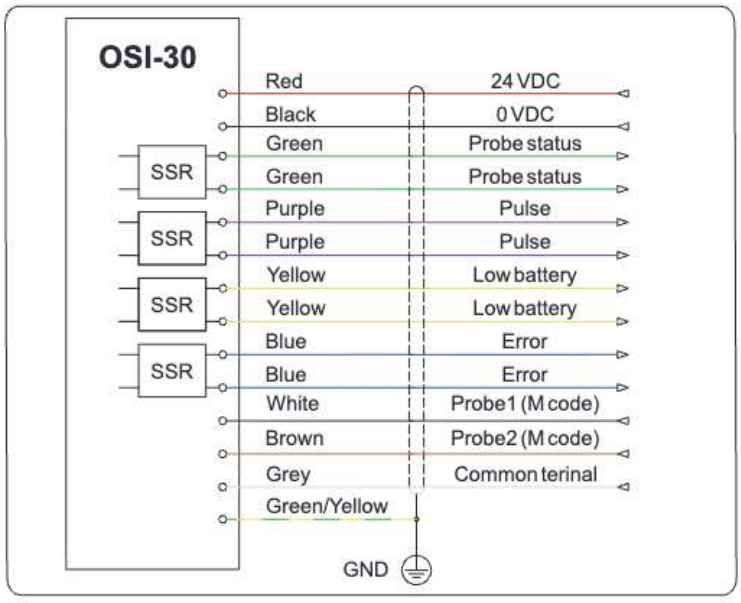

- The cable length is 8 meters
- Fixed bracket with universaladjustment function is equipped

SPECIFICATION

Protection function	low battery voltage, overstroke and signal interrupt protection *
Applicable	probe or zero setter
Infrared transmission/reception range	3m
Cable length	8m
Dust/waterproof	IP68
Power supply	input voltage: 24V±10% (DC, CNC machine main board), load current (max): 50mA

* When battery voltage is low or zero setter is in wrong state, receiver sends a signal to CNC machine to stop working
