KB PRÜFTECHNIK GMBH

TG 8

Torque Measuring Range:
200 Ncm
100 Ncm

Testing machine TG 8 for testing right and left wound leg springs with simultaneous display of digital 6-digit rotary moment and 6-digit angle display. The angle is measured in 3600 steps per rotation, which corresponds to a resolution of 0,1 degrees. The device has a data output for connection to a personal computer with spring testing software SpringWin for Windows XP/ 7.
The measured values are determined in a continuous process and can be reconstructed at any time via the stored spring core line. A commercial printer with LPT center NIC interface can be used for printing reports.

	Maximum Value	Resolution
Measuring	200 Ncm	0,002 Ncm
Range:	100 Ncm	0,001 Ncm

Further measuring ranges on request.
